

BUILDINGS AND APPLIANCES TASK FORCE

8th Meeting

7-8 October, 2009

Tokyo, Japan

Standby Power

Presentation by Mr Hilton Taylor

**Australian Department of the Environment, Water,
Heritage and the Arts**

Project Summary

- Aim is to develop a common policy framework across APP Partner countries to deliver lower standby power (1 watt *voluntary* target by 2010)
- Partners have agreed to:
 - a basket of common products
 - a simple measurement approach
- Website completed and available to the public at <http://www.energyrating.com.au/standbydata/app>.

Project Status Update

Resource Update

- AUD\$1,860,000 final funding approved from the Australian Government
- In-kind commitment of AUD\$850,000 from Korea, China, India, US, Japan, IEA, KEMCO, IIEC, AEEMA, CESA

Next Steps

- APP & IEA 4E Group are holding a joint workshop in Korea in November
- Training session on data collection in China in November
- Review of European regulatory proposals
- Network Standby
- Continue data collection activity (twice yearly) and reporting

Input Needed from Project Team

- Support for delegates to attend meetings
- Submission of data for reporting on website
- Submission of data and articles for **LoadDown** newsletter
