Project Number: CLM-06-11	Task Force: Coal Mining
Title of Project: Methane to Markets (M2M) Hebi Coal Mine Methane (CMM) Feasibility Study	
Lead Partner Country: United States	
Participating Partner Countries and Organizations: China Sakal Joint Venture (includes Hebi Coal Industry Group)	
Project Location (Country, State/Province, City): Hebi Mine, Henan, China	
Project Manager Information	
Name: Dr. Jayne Somers	Phone: 202-343-9896
Organization: USEPA	Fax: 202-343-2202
Address: Washington DC	Email: somers.jayne@epa.gov
Project Start Date: October 2007	Date of Project Status Update: October 2009
Actions Since Last Update: Reservoir analysis and modeling complete.	
Deliverables Since Last Update: Geologic overview, resource assessment, and reservoir analysis Date Completed: early 2009	
Milestones Reached: Two meetings between mine management and CMM experts conducted. Coal mine methane pre-feasibility study and methane resource assessment complete. This analysis includes seismic data, subsurface geologic data, core desorption measurements, methane emission measurements and projected coal production at the mine for the next 10-20 years.	
Next Steps: Prepare market assessment for the produced methane.	
Proposed Project End Date: September 2009	Project Already Complete: <input type="checkbox"/> Yes <input type="checkbox"/> No °
Other Information: If the CMM feasibility study is successful, a financing mechanism is in place for project implementation.
